The Digital Linguistic Mentor (DLM) is a revolutionary software-driven language learning laboratory that blends time-tested methodologies with interactive technology to deliver a superb teaching and learning experience. The methodology is LSRW or Listening-Speaking-Reading-Writing in tandem with appropriate learning materials brought to you through easy-to-use yet state-of-the-art information technology that is preprogrammed to run seamlessly across multiple operating systems while making the learning process interactive and enjoyable. DLM is indeed an effective evaluation tool for the mentor and an efficient communication boon for the mentee.
Digital Linguistic Mentor

DLM integrates the latest technology around practical approach to learning that have been advocated by scientists, theorists, and educational psychologists for years. Virtual reality, visualization, digital modeling, digitization, simulation, games, virtual worlds and intelligent one-on-one tutoring systems dramatically enhance teaching and learning of elusive concepts by translating abstractions into real-world contexts and providing customized instruction and individualized assessments. However, Mentors and Mentees will be perfectly at ease with DLM as no specialized IT skills are required in the comfortable teaching and learning environment provided by our interface.

Techniques to improve macro skills of language Through DLM

Among the four macro skills of language learning, listening and reading are receptive skills whereas speaking and writing are the productive skills. These skills can be improved effectively, when the learner learns at his own pace. With the help of the functional tools integrated into the Mentor Console, language skills can be taught, practiced and evaluated through the techniques followed.

Listening

The primary form of linguistic communication is speech and listening is the most important receptive (and learning) skill for foreign language students. An ability to listen and interpret many shades of meaning from what is heard, is a fundamental communicative ability. Teaching listening involves training in some ‘enabling skills’ – perception of sounds, stress, intonation patterns, accents, attitudes and so on, as well as ‘practice’ in various styles of listening comprehension.

Perception / Pronunciation

Accurate perception of the sounds of the language is the first stage which leads to interpretation and comprehension. When listening to a foreign language, we need to know the sounds, rhythms, tunes and stress patterns of that language. All the pronunciation work which we do will benefit the Mentees’ listening ability.

Interpretation

We listen to interpret meaning. Most of the exercises which students will do focus on listening comprehension, which is interpreting meaning from spoken language.

Speaking

Mentees’ speech evaluation is possible through the digital recorder modules in DLM. Mentees’ audio recordings can be saved for later evaluation. The system can Record their own voice notes that Mentor can hear later as they review their work.

DLM Essential

DLM from Thaliyola

Using techniques originally developed for the U.S. State Department, the DLM Method follows a four point approach from building a foundation of essential words and phrases, advancing to full sentences and conversations, practicing with recall exercises aimed at both short and long term memory and developing practical language skills to equip the learner in any situation. DLM is brought to you by ace language specialists at Thaliyola Infotech Pvt. Ltd.

Why Choose DLM?

The answer is simple :

- DLM works
- Methodology is effective
- Multi-lingual Platform
- Easy-to-use, fun & cost-effective

The DLM Method is not a game of charades. It makes intelligent use of world-class IT-enabled tools to teach and learn without clumsy guesswork or frustration – quickly master any foreign language.

DLM Essential & DLM Advanced

Track learning progress through DLM

DLM provides Mentor with a number of methods for evaluating Mentee - performance and tracking their progress by using writing, listening, recorded and web-based activities to stimulate learners to make use of their growing oral and written language skills while storing results for comparison over time, so that progress can be measured.

Lesson Maker

Provided in the Mentor Console is an excellent tool to make a customized interactive and automatic lesson. These lessons can contain text, graphics, audio & video . This allows teacher to use virtually any media available to create tests and evaluate the learners. Ex. Question types may include multiple choices, true/false, fill in the blanks and essay. Speaking can also be evaluated through digital recorder module. Mentor’s working on assignments or conversations in groups can be evaluated. Their audio recordings can be saved for evaluations.
